«Metafrax Chemicals» has highest regard for the work of «Stellar Construction» Ltd as a large sub-contractor of general contractor OJSC «NIIK» during the construction of OSBL objects during the construction project implementation of Ammonia-Urea-Melamine production complex based on purge gas from methanol production (AUM Complex) in Gubakha, Perm region.

During the construction of AUM Complex, the civil works and mechanical installation activities were performed by «Stellar Construction» Ltd. All works were performed within the time limit and with the required quality.

«Metafrax Chemicals» notes «Stellar Construction» company to be a qualified construction contractor, with its special emphasis on production standards and safety provision during the construction activities as well as social responsibility towards its personnel.

**General Director**

**V. A. Daut**
